# School vision and hearing screening

National Vision and Hearing Screening Programme • Child & Family Service

Te Whatu Ora Waitematā provides free vision and hearing screening for children. This screening is carried out by vision and hearing technicians who visit schools and provide vision and hearing clinics in various community locations.

## Vision test

**Distance vision** – a letter-matching (or letter-identifying) screening test determines whether the child can see what is expected at a distance of four meters. This is not a full diagnostic assessment.

## Hearing test

**Audiometry** – an audiometer is used to measure hearing. The child wears headphones and indicates every time a sound is heard.

**Tympanometry** – if the child does not seem to hear all the sounds with the audiometer test, tympanometry is used to show whether there may be ‘glue ear’ or some other blockage in the hearing system. A soft rubber cap seals the opening of the ear and a measurement is made of how well the ear drum reacts to sound and changes of ear pressure.

Parents/caregivers will be informed of all results (including any problems identified). If your child does not pass a vision and hearing screening test, you will receive a letter suggesting what to do, including recommended follow up.
